

**FOR IMMEDIATE RELEASE**

**IM Your Doc Announces a Strategic Partnership with Greenway Health EHR Solutions**

San Diego, CA, August 2018 – IM Your Doc, the healthcare industry’s premier real-time mobile messaging platform, has signed a marketplace partnership with Greenway Health, a leading-edge global electronic health record (EHR) and practice management solutions provider.

Through this partnership, IM Your Doc will be integrated with Greenway’s Intergy and Prime Suite solutions. Intergy is a cloud-based EHR and practice management tool designed for value-based healthcare environments. IM Your Doc will also be woven into Greenway’s Prime Suite, a cloud-based, clinically-driven EHR and practice management system that handles documenting, billing and reporting for practices. “The focus of the partnership is creating a true end-to-end mobile communication system for physicians, practices, healthcare staff and patients,” says Dana Allison, CEO IM Your Doc. “With our comprehensive and highly intuitive messenger structure, Greenway users will be able to communicate critical information in real-time, to the mobile device for better coordinated, rapid patient care, all within a HIPAA-compliant and user-friendly framework.”

As an integrated software, Intergy and Prime Suite users will have full access to IM Your Doc’s core capabilities, including real-time notifications, HIPAA-compliant secure messaging and a host of emerging extensions including group messaging and care coordination, read verification, telemed and masked voice calls. Practices will be able to push the important clinical or care plan information from its IM Your Doc mobile platform into the patient record for smoother workflows and more consistent, cohesive engagement and document management.

“This partnership will create a simple, streamlined and much-needed solution for Greenway practices and partners,” says Dana Allison. “Users will be able to operate in their existing frameworks but, at the same time, we’ll be delivering a mobile-first, end-to-end solution providers and patients have been looking for.”

By streamlining internal and external communications, practices can improve patient response, curb unnecessary tests and improve bill pay and reimbursements, all while maintaining HIPAA compliance. “The healthcare landscape is changing,” says Dana. “By coming together, IM Your Doc and Greenway can keep pace with provider and patients’ changing wants, needs and demands. Together, we’ll meet and exceed those benchmarks, improving care and helping countless patients and providers in the process.”
